Cloud Computing - Conference Details

Description:

The Cloud Computing Conference brings together cloud experts, architects, and technology leaders to discuss the latest advancements in cloud technology. The event covers topics such as cloud infrastructure, cloud-native development, multi-cloud strategies, and serverless architectures. Attendees will learn about the best practices for scaling cloud applications, optimizing costs, and leveraging cloud services to drive business innovation.

Address:

N/A

Date:

2024-10-10T05:00:00.000Z

Speakers:

1. Name: Dr. Sarah Thompson
Bio: Dr. Sarah Thompson is a renowned expert in cloud computing and distributed systems, with over 18 years of experience. She specializes in designing scalable cloud architectures and optimizing cloud infrastructure for large enterprises. Dr. Thompson is a professor at the Global Institute of Technology and an advisor to cloud startups.

Email: sarah.thompson@globaltech.edu

Description: Dr. Sarah Thompson will discuss the latest trends in cloud computing, focusing on building scalable and resilient cloud infrastructures. Her session will cover cloud-native development, microservices, and multi-cloud strategies.

Discussion Topic: Challenges and Opportunities in Cloud-Native Development
Session Title: Scaling the Cloud: Architectures for the Future
Start Time: 10:00:00
End Time: 11:30:00
